SOSCIP Terms of Use

General Principles

SOSCIP facilities are provided for the benefit of the research and development community. Users are responsible for ensuring that their use of the facilities conforms to ethical standards, respects all laws, and is consistent with the platform-specific Terms of Use.

Platform-specific Terms of Use

In the first instance, your rights and responsibilities are defined by each platform's terms of use, as set by the organizations which host and mange those platforms.

For the **Cloud Analytics** system (SHARCNET): https://www.sharcnet.ca/my/systems/aup
For the **GPU and Parallel-CPU** system (SciNet): https://portal.scinet.utoronto.ca/usage_policy

IBM Software License Terms

For projects that use software from the IBM Academic Initiative catalogue, the terms and conditions of the Academic Initiative apply (http://ibm.biz/academic-initiative-agreement). These terms and conditions are non-negotiable. In particular, distribution to third parties is expressly prohibited:

"Eligible Resources may not be 1) used, copied, modified, or distributed except as provided in this Agreement; 2) reverse assembled, reverse compiled, or otherwise translated, except as specifically permitted by law without the possibility of contractual waiver; 3) sublicensed, rented, or leased; 4) have Internet "links" to or from the offering for third parties to access."

Protection of Data

Your data and backups are stored in Canada. All aspects of data management (including, but not limited to, access control, duration of storage, destruction protocol, requests to have data removed, ownership and confidentiality of data, etc.) will follow prevailing industry best practices, as determined from time to time by the platform system administrators.

Your data will be stored and protected for the duration of your SOSCIP project. At the end of the project, you are responsible for safeguarding your data and deleting it from SOSCIP systems. Depending on circumstances, alternate arrangements may be made with the hosting institutions to accommodate the storage of the data.

Acknowledging SOSCIP

When SOSCIP resources are used to produce results that are published in the literature, the authors must acknowledge SOSCIP using the following text:

"Computations were performed on the SOSCIP Consortium's [Parallel-CPU, GPU and/or Cloud Analytics] computing platform(s). SOSCIP is funded by FedDev Ontario, IBM Canada Ltd. and Ontario academic member institutions."
